MONTEVIDEO

URUGUAY

San Felipe y Santiago de Montevideo overlooks the north shore of the Rio de la Plata where the waters of the mighty river meet the Atlantic Ocean. At first the site was simply a small Spanish military fort built in 1714 as a way of countering Portugal's expansion of Brazil. However, settlers were not very interested in the area. The Spanish governor in Buenos Aires, Don Mauricio Zabala, offered cattle and land to the first groups that would come and lay the foundations of a town. Among the earliest to arrive were families from Spain's Canary Islands. They sailed into the small bay and came ashore in 1726.

Over the next decades Montevideo slowly grew into an essential port for trade between the "Old and New World". In the late 1700s Montevideo had developed into one of the most important and profitable ports in all of South America.

Today, with a population a little over 1.5 million, Montevideo, especially the "Old City" has a classic and inviting European charm and elegance. There are broad boulevards, peaceful parks and refreshing fountains, stately plazas and imposing monuments dedicated to respected national heroes. The city has colorful, bustling markets and beautifully designed old world buildings. The busy harbor attests to the fact that Montevideo remains Uruguay's primary port. However, it is the well deserved reputation of the warmth of her people that makes Montevideo one of the nicest cities in all of South America.

HISTORY

By means of Papal decree, in 1493, just after the return of Captain Christopher Columbus from his discovery of the West Indies, Pope Alexander VI drew a north to south line down a map of the earth (as it was known at the time). With the stroke of his pen, and the promise of untold riches, the pope divided all the newly discovered lands west of 38° W as belonging to Spain and everything east of the line as belonging to Portugal. A couple years later, with the signing of the Treaty of Tordesillas, the line would be moved eight degrees further west thereby giving much of modern day Brazil to Portugal.

Little Uruguay would be caught in the crush of the two superpowers. When the Spanish and Portuguese realized that Uruguay had neither silver nor gold, they were not sure what to do with the region. This did not stop the two countries from fighting over Uruguay, however. Spain eventually established the first permanent settlement of Villa Soriano 1624. It would take just over a century for Spain to gain complete control of Uruguay.

In 1811 Uruguay rebelled against Spanish rule. Though still having to continually struggle against Brazil and Argentina, Uruguay finally gained politically recognized independence in 1828 with Montevideo as its capital. But difficulties in dealing with Argentina and Brazil persisted. At one point (1843-1852) military forces from Buenos Aires laid siege to the city for nine years. A large wave of European immigrants (primarily Italian and Spanish among many others) came to Uruguay in the late 1800s and early 1900s.

Internal strife, political divisions, civil war, foreign intervention, failed governments, faulty economic theory, Marxist guerrilla movements, military coups and juntas all added up to many decades of hardship for the people of Uruguay. In 1985 civilian rule was restored under a Constitutional Republic system of government.

Grappa miel is Uruguay's national drink. A honey and alcohol concoction, it was introduced to the country by Italian immigrants. Mate, a hot herbal tea, is also very popular.
